

PHYS 5BL–Spring 2026 — Prelab 4 Response

Vijay Hans, SID 3041285081

February 4, 2026

1. Image Below:

2. (a) $P(\text{Double Red}|\text{Red}) = \frac{P(\text{Red}|\text{Double Red}) \cdot P(\text{Double Red})}{P(\text{Red})} = \frac{1 \cdot 1/3}{1/2} = \frac{2}{3}$
- (b) You need to verify that all cards with even numbers have blue faces on the other side (so flip over 8) and you that all cards with non-blue faces have non-even numbers (so flip over red).
